In Japanese schools, the students don't get ANY exams until they reach grade four (the age of 10)! Why?

Because the goal for the first 3 years of schools is NOT to judge the child's knowledge or learning, but to establish good manners and to develop their character!

Yes, that's what our scholars taught us: Manners BEFORE knowledge!

Should this method be implemented all over the world? — with [Ajayram Challa](#) and [Ram Kalyan](#).

A new Philippine population of critically endangered Irrawaddy dolphins has been spotted off Quezon, Palawan.

Spotted by chance, a pod of at least 20 individuals was seen foraging for prey. This is a relatively large sized pod for this uncommon species, where groups of fewer than six individuals are most common.

Not all chocolate is created equal:
<http://naturalsociety.com/is-chocolate-good-for-you/> — with Pam Osen and 7 others.

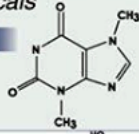

Several substances found in chocolate are linked with mood enhancing brain chemicals

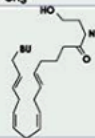

A substance popularly dubbed the 'love chemical' associated with feelings of attraction and excitement

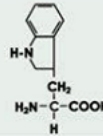

A mild stimulant
that causes mood
elevating effects

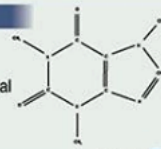

A messenger molecule associated with natural highs similar to the effects of cannabis

A raw material that helps the brain make serotonin, which promotes feelings of well being

The well known
stimulant that
acts on the central
nervous
system

Glass frog

The glass frogs are frogs of the amphibian family Centrolenidae. While the general background coloration of most glass frogs is primarily lime green, the abdominal skin of some members of this family is translucent. — with Tami Miller and 47 others.
